

Welcome to my dashboard!

Kafely is a fictional coffee shop chain based in New York, currently with three outlets and more than two thousands loyalty program members. Not only selling coffee, **Kafely** also sells tea, drinking chocolate, and other non-beverage products such as pastries and branded merchandises.

<u>Using its customer, receipt, and sales outlet data, I made two dashboards:</u>

Head Office - Now that **Kafely** already has three outlets, use this dashboard to keep abreast of the coffee shop chain's overall performance and sales. Know **Kafely**'s revenue trend, everyone's favorite products, and the growth of its membership club.

Member Activity - Speaking of membership, more members join **Kafely**'s club every day, but how are our members doing? Keep them happy and use this dashboard to find out what they're up to!
